

Company Profile

Mentana-Claimsoft AG, the specialists for signatures, long-term archiving and ID management

Since 1997, Mentana-Claimsoft AG has been specializing in the area of electronic signatures and offers a comprehensive product line for protecting electronic documents and for legally secure communication. Signature and verification solutions as well as evidence preservation and ID management systems are being developed for application across all sectors. Mentana-Claimsoft AG has three branch offices in Germany as well as a location in Switzerland. In addition, customer-oriented service is guaranteed through partners. Fields of expertise include:

Signature Products

Mass signature and verification servers for digital signatures used in various scenarios. Especially for electronic invoices, mass scans in the area of archiving and for e-Government applications.
Digital signatures directly from Microsoft Office and OpenOffice. Integrated PDF signatures for generating secure PDF documents (for example, electronic verdicts, electronic administrative decisions and contracts).

Preserving Evidence

Long-term archive for preserving the evidence value of electronically signed documents beyond the lifetime of the algorithm.
Timestamp server for accredited Trust Centers in Germany (Authentidate AG, Deutsche Post Com, D-Trust).
Court-approved quality control and fault management for the construction and real estate sector.
Timestamp security solutions for copyright protection as well as logo and design protection.

Intermediate Portals

www.signaturportal.de – signatures and verification of invoices for small and medium companies
www.kanzleipostfach.de – virtual post office for attorneys and notaries who work in the court system (“ERV-D Ready”)
www.govmail.de – virtual post office for public authorities and municipalities

ID Management

Integrated PKI solutions for certificate management, directory services, timestamp server, verification portal and smartcard customization.
Certificate-based online identifications and age verification systems.
Mapping of agency hierarchies for centralized signature functionality in eGovernment.

Consulting/Training

Our developer and consulting teams are made up of highly qualified computer scientists and lawyers. We are happy to provide non-biased consulting services in any technological field. Take advantage of grown over years of ever-increasing expertise for consultancy, technology evaluations and training.
